## Blue e+ Cooling Unit Series

### Blue e+ Delivers Energy Savings Up to 75%

The Blue e+ uses an innovative process that relies upon two parallel cooling circuits working together, adjusting to the desired temperature of the enclosure. The integral heat pipe passively dissipates heat while active cooling is achieved via the compressor's cooling circuit with variable speed-controlled components. This unique inverter technology provides cooling output that is on target at the time it is needed. By combining variable speed cooling components Blue e+ delivers significant energy savings and a longer service for the enclosure components.

#### The e+ Principle

- **Efficiency** – Energy savings of 75% with speed-regulated components and heat pipe technology
- **Versatility** – Multi-voltage capability adapts to international
- **Longevity** – Automatic shut-off and variable speed of components greatly increases service life
- **User-friendliness** – Automatic shut-off and variable speed of components greatly increases service life

**Blue e+ enclosure air conditioners can save up to 75% in enclosure cooling costs and energy.** Featuring hybrid, climate control with patented heat pipe technology, the unit offers a range of powerful new features that provide longer component life, flexibility and ease of use.

Join the revolution in hybrid technology. **Never compromise** on savings, efficiency and longevity.

Download the **ChillZone® App**

### Easy Assembly

- One version for external mounting, partial internal mounting and full internal mounting
- One mounting cut-out for external mounting, partial internal mounting and full internal mounting in multiple output categories
- Maintenance-friendly, tool-less filter mat replacement

## Choose the Best: Wall-mounted air conditioners Blue e+

### Benefits:

- 75% energy saved due to speed-regulated components and heat pipe technology
- Suitable for international use due to a unique multi-voltage capability
- Longer service life of the components inside the enclosure and the cooling unit due to component-friendly cooling
- Intuitive operation due to touch display and intelligent interfaces

### Temperature control:

- e+ controller (factory setting +35°C)

### Material:

- Sheet steel

### Color:

- RAL 7035

### Protection category IP to IEC 60 529:

- Internal circuit IP 55

### Supply includes:

- Assembly parts

### Output class 2000 – 6000 W

# Rittal – The System.

Faster – better – everywhere.

## TS 8/TS 8 316 Stainless Steel Enclosures

### TS 8 Modular Enclosures Invented Here. Perfected Here. Poorly Copied Over There.

The TS 8 enclosure is Rittal's flagship product, with more than 10 million units sold to date. Across North America and around the world, industries as diverse as Oil & Gas, Food & Beverage, Water Supply/Wastewater Management, Wind Power, Data Centers, Chemicals and Medical Technology rely on this versatile, modular enclosure design for panel building, low-voltage switchgear, IT infrastructure and mechanical engineering applications.

Combined with Rittal's climate control and power distribution systems, the TS 8 enclosure safely and efficiently protects electronic equipment, control and processing systems in the harshest environments, the hottest factories and the most demanding conditions. Accessories enable the TS 8 to be the world's most adaptable enclosure for industrial and IT needs.

*An enclosure that fits every need: IP66, NEMA 4/4X, EMC, Power Distribution, Baying, Server and Network, Electronics.*

#### Proven More Than 10 Million Times Over

Highly innovative and remarkably flexible, the TS 8 is available in more than 100 versions off the shelf and comes in carbon steel, and 304 and 316 stainless steel varieties. Its modular construction allows for easy assembly, baying, equipment installations, removals and reconfigurations.

- Greater Efficiency
- Unlimited Flexibility
- Increased Safety
- Better Quality
- Greater Productivity

There are over 350,000 configurations of the TS 8 line of enclosures available off-the-shelf

### System Accessories

**Intermediate Hinge CP 120**

*Without height offset.* For vertically hinged connection of horizontal support sections within the support arm system.

**Clamping Elements**

*for support sections CP 60/120, open.* For additional protection against rotation and twisting of the open section.

**Interface Flap**

*For RC circuit-breaker.* Under the current Safety of Machinery Standard EN 60204-1, all externally accessible sockets on an enclosure must be fused with an RC circuit-breaker. Prepared for the installation of standard, 2-pole RCBO circuit-breakers.

**Mounting angles additional fastening attachment**

*For TS IT.* Prevents the mounting angles from twisting in case of unevenly distributed loads. Secured directly between the mounting angle and a mounting section on the outer mounting level of the TS frame structure.

## Rittal – The System.

Faster – better – everywhere.

## TS IT Dynaload Rack

### TS IT Dynaload Offers Superior Safety and Ease-Of-Use

Safely transport critical Data Center equipment eliminating additional labor and transportation costs. The shock pallet variant integrates a rigid design with additional bracing, ensuring a safe delivery. The rugged TS 8 rack, with 16-fold vertical sections, 9-fold horizontal sections and 19" component mounting rails secured directly to the patented frame, is delivered ready for component installation. Individual racks, with pre-installed casters, are shipped on shock absorbing, reinforced pallets with multipurpose brackets. Pallets and brackets are suitable for reuse.

#### Unpack. Build. Repack. Deploy.

The low profile frame system provides the greatest usable internal volume and ease of access from all angles, providing ease of installation for components while minimizing impact on installed devices. Two (2) parallel, full depth slotted roof cable entry cutouts with brush strips provide cable management flexibility, ease of cable installation and support airflow management. A center cutout can support roof mount fan installation.

Single piece front and split rear doors are fully perforated, providing up to 85% of open perforated surface area. The large perforated surfaces maximize airflow through the enclosure.

The Rittal advanced shipping system adheres to strict international Safe Transit Association (ISTA) standards. Intelligent and economical packaging, suitable for reuse, is applied at Rittal's Ohio facility to each enclosure.

Additional features address thermal and cable management, including multi-functional roof design and cable management accessories.

*The reinforced pallet with multi-purpose brackets is able to withstand transport hazards such as dropping or uneven flooring.*

**Smart Design**  
enables movement of equipment up to 2500 lbs.

# Rittal – The System.

Faster – better – everywhere.

## IT Cooling Solutions

### Cooling Solutions to Protect Vital Equipment

From Enclosure Based to Room Based Thermal Management.

Controlling climate is key, and Rittal has a lock on a complete range of solutions: CRAC, in line/in row, chillers, condensers, pipe installations, water distribution cabinets or water heat exchangers. Each product offers state-of-the-art, high efficiency climate control technology. We can support your precise application with planning, assembly, commission and service, all from your one stop supplier.

#### All Optimally Coordinated to the Tailored Requirements of your Data Center.

You know that 30-50% of your data center energy costs are attributable to your cooling infrastructure. When your best IT Cooling Solution includes Rittal, you know that you are achieving energy efficiency while you reduce investment and running costs, save resources and CO<sub>2</sub> output while your IT components work to capacity.

### Flexible Product Spectrum

From entry-level systems IT cooling to a high-end, multi-unit application, Rittal IT Cooling Solutions bring cost-efficiency to each installation, with the best options to maximize your savings without sacrificing computer or server performance.

Wall-mounted cooling units

## Rittal – The System.

Faster – better – everywhere.

## RiLine Busbar Systems

### RiLine Busbar Systems Improve Enclosure Efficiency

Use of RiLine copper busbar system provides reliable electrical power distribution, requires less panel modification, and fewer contact points and wiring work. By eliminating power distribution blocks, line-side wiring and large, parallel cable runs, busbar systems save space and time for IT managers and increase contact hazard protection.

### Power Management Systems Simplify System Expansion

RiLine Busbar systems enable expansion without additional wiring. Rapidly add or change operational layouts without losing uptime. New components can be simply snapped onto the unpopulated bus system.

Power  
Management  
Systems

**Reduce  
Space**

up to 50% within  
enclosures

### Flexibility is in the Design

Up to 1600 A current rated systems, available 60 mm bar center distance, 3 or 4 pole design are just some of the design options for your RiLine Busbar system. You get a continuous, reliable connection, with the safety of all around contact protection. In addition, the systems meet all international standards, including IEC, UL, and CSA.

**Rittal – The System.**

Faster – better – everywhere.

## Flange Mount Disconnect

### Flange Mount Disconnect Protects Panel Modifiers

Safe, Smart Technology That Meets Industry Standards for Panel Builders.

Preventing your staff from opening a powered enclosure is a safety measure you can control. Rittal is one of the few manufacturers of a Flange Mount Disconnect Enclosure that truly meets the UL508A Standard, the standard for the construction of Industrial Control Panels.

If the Slave Door is open, the Master Door cannot be closed and power cannot be turned on. The Master Door can be closed and the system powered on only when all of the Slave Doors are closed. The Slave Door Interlocking Kit provides the means to lock the slave door while the master door is closed and the power is on. It also prevents the Master Door from closing while the Slave Door is open and unsecured.

If the **Slave Door** is open, the **Master Door** cannot be closed and power cannot be turned on

## Hygienic Design Wallmount

### Excellence in Hygienic Standards for the Food Industry

Successful Hygienic Design (HD) helps you battle the ever-present contamination risks. It is crucial to maximize the units safety for open processes. Our terminal boxes and compact enclosures are key elements in our plan for your ease of cleaning solution. But we don't stop there. Bypassing system and production data enclosures can be integrated with ease into production clean rooms. Flexible design options for almost infinite possibilities. Compatible accessories such as wall spacer brackets and HD-compatible cable glands customize your unit to your exact specifications.

#### It's All About the Cleanliness

Our designs optimize your cleaning. There is no external cavity between the enclosure and the door. Strategic silicone sealing is joint-free, extends all around, and is a distinctive blue color to distinguish it from foodstuffs. Hinges are inside the sealing zone to create an exceptionally easy-to-clean surface on the outside. Every surface is designed with durability while being easy to maintain, from captive screws to stainless steel locks. Contamination risks are minimized, reducing the excessive use of cleaning and disinfecting agents.

Roof angled forward at 30° to allow fluid to drain rapidly and to be easily inspected.

**SILICONE SEAL**  
prevents the accumulation of dirt

## Hygienic Design (HD) Wallmount

### Benefits:

- Easy-to-clean, hygienic design
- A roof tilt of 30° prevents objects from being deposited on it, and allows liquids to run off quickly
- All-round external, replaceable silicone seal prevents the accumulation of dirt between the enclosure and the air/water heat exchanger

### Temperature control:

- e+ controller (factory setting +35°C)

### Material:

- Enclosure: Stainless steel 1.4301 (AISI 304)

### Surface finish:

- Enclosure: Brushed, grain 400, peak-to-valley height < 0.8 µm

### Protection category IP to IEC 60 529:

- IP 55

### Protection category IP to DIN 40 050-9:

- IP 69K

### Protection category NEMA:

- NEMA 4X

### Supply includes:

- Fully wired ready for connection (plug-in terminal strip)
- Drilling template
- Sealing and assembly parts

### Further technical information:

Available on the internet

### Output class 600 – 1300 W, wall-mounted HD

## LED Light

### Brilliant! Innovative Lighting Designed For Enclosures and Sealed Cases

Shine some light in your enclosure with the Rittal LED Compact Lighting System. It is safe, with an extra low voltage range. And it packs the newest generation of LED technology for double the luminous flux of past lighting. A Fresnel structured optical cover spreads light coverage throughout the enclosure. With the LED system, you blend economical energy use with low maintenance.

### Get Attached to Intelligent Lighting

For optimal illumination of every corner of your enclosure, Rittal LED Compact Lighting is perfectly integrated to the TS 8. Fast and tool-free assembly simply clips to the latch-in hook pattern, and optional screw fastening is available. Or go magnetic, for freely positionable locating within the enclosure. Motion detection or door operated switch is available for hands-free illumination. Suitable for immediate, global use with wide-range voltage 100 – 240 V (AC) and 24 V (DC).

**The Facts:**  
Engineered better to perform  
better than the competition

### Link to the Value Chain

From the very first customer interface through every process necessary to completing a customer's order...each step forms a link in the Rittal Value Chain.

Every step optimizes your production process. We work with you to harness your efficiency potential. Requirements are defined, as together we simulate and virtualize your control panel design. Individual

production stages are validated and documented in the virtual design. When the design is complete, assuring that materials and resources are most efficiently utilized, it is output to machinery which will begin the production. Once complete, safe delivery is made, your system is seamlessly installed and you receive ongoing service support, assuring your complete satisfaction.

Rittal brings the Industry 4.0 Value Chain to control panel designers at any organization of any size. You will appreciate the effective production and increased flexibility for your industry edge.

### ePlan: The Gateway to Project Planning Efficiency

Imagine a uniform project planning environment for electrical, fluid, E&C engineering and enclosure assembly, all in 3D. ePlan directs you through each field of action: *IT infrastructure, product structure, platform set-up, codes and standards, workflow, process integration and process management*. It's highly modular and allows the most flexibility in application.

Support comes from targeted ePlan packages:

- **ePlan Electric P8:** CAE software for the planning, documentation and administration of electrical automation projects.
- **ePlan Pro Panel:** For the 3D engineering and verification of control cabinets and switchgear, including access to device data.
- **ePlan Fluid:** CAE software for the configuration and documentation of circuits in fluid power installations in hydraulics, pneumatics, cooling and lubrication.
- **ePlan PPE:** For planning and configuring of process automation, measurement control and regulation systems for data exchange to integrate with all processes.
- **ePlan Data Portal:** Integrated, web based data portal providing access to up to date device data from leading component manufacturers.
- **ePlan Engineering Configuration:** Functional mechatronic configuration solution for consistent sales and production management processes for consistent workflow. Reduces time and costs in engineering by up to 50% while quality of documentation is increased.
- **ePlan Harness ProD:** Simplifies one of the most important phases of the design and documentation of wire harnesses and nail boards.

We help you make your engineering processes even more intuitive, faster and more target-oriented.

### Rittal: World Leader in the Field of IT and Industrial Enclosure Systems, Climate Control, and IT Infrastructure Solutions.

When you specify product for a comprehensive data center or a single stand alone enclosure unit, know that Rittal keeps your user experience at the forefront in everything they do. Our innovations don't simply introduce something new and different, they solve a problem, improve your efficiency, lower your costs or decrease CO<sub>2</sub> footprint. We chose our superior stainless steel for TS 8 to withstand your most aggressive environment. We developed Blue e+ to be the world's most efficient cooling unit to save you operating costs, and give your components a longer service life. Rittal wants to give you and your company the global competitive advantage you deserve.

### Rittal Automation Systems (RAS) to Optimize your Panel Building Processes

We've automated panel building and switch-gear engineering with comprehensive range of solutions from manual tools to fully mechanical engineering solutions. We can assist in implementing the exact modifications for your individual panels.

- **Machining:** Discover our solutions for the fully automated, fast, precise and reliable milling or laser machining of enclosures and cases, plus cut-optimised machining of cable ducts and DIN rails.
- **Assembly:** Find enhanced efficiency with automated production of clamping strips and ergonomic component mounting systems.
- **Wire Processing:** Professional and practical solutions for wire machining and processing featuring simple and reliable handling.
- **Wiring:** Our fully automated wiring of mounting plates offers efficient wiring and intuitive control.
- **Tools:** High quality manual tools available for use by those with high professional standards.
- **Handling:** Ergonomic, efficient handling systems for transport and lifting operations.

For each step, Rittal Automation Systems will simplify and streamline your panel building process.
